

EVERY DOMAIN, RANKED BY SCORE OUT OF 100

EXCELLENT GOOD OK POOR CRITICAL

INDEX REPORT · INDEX COHORT

The 10 best performing websites for AI agents October 2026

DOMAINS 10 MEDIAN 87.7 SNAPSHOT OCT 8, 2026 UTC

WHAT THE SNAPSHOT SHOWS

10 domains from the Index cohort (the domains the Index re-scores every month). Of those, only the 10 highest-scoring domains. Snapshot taken Oct 8, 2026 (UTC).

MEDIAN SCORE

87.7 Excellent

The median domain scores **87.7** out of 100, in the Excellent band.

GOOD OR BETTER

100%

10 of 10 domains score 72 or more.

POOR OR CRITICAL

0%

0 of 10 domains score under 58.

STRONGEST CATEGORY

93.4 Excellent

Discovery averages **93.4**; Market ranking is the weakest, at **72.5**.

AGENT SESSIONS

100%

10 of 10 domains were scored with live agent sessions; the rest on protocol probes alone.

01

How the scores fall

10 domains by score band, 100% good or better.

87.7
median

Excellent	Good	OK	Poor	Critical
6 (60%)	4 (40%)	0 (0%)	0 (0%)	0 (0%)
85+	72-84	58-71	40-57	<40

The median is 87.7 and the average 86.5, out of 100.

02

By category

Average score in each category, strongest first. Discovery leads; Market ranking trails.

08
categories

03

By sector

Median score in each sector, highest first. Sectors with fewer than five domains are listed but not compared.

05
sectors

Sector	Domains	Median	Average	Highest score
Professional services	1	91.7	91.7	cloudflare.com 91.7
SaaS	6	88.3	87.4	stripe.com 89.0
Utilities	1	84.6	84.6	figma.com 84.6
Marketplace	1	83.3	83.3	ramp.com 83.3
Travel	1	80.5	80.5	airbnb.com 80.5

04

Every domain in this report

Scores as they stood at the snapshot, highest first. Each name links to its live scorecard.

10
domains

Rank	Domain	Sector	Score
1	**cloudflare.com**	Professional services	91.7
2	**stripe.com**	SaaS	89.0
3	**stuntdouble.io**	SaaS	89.0
4	**linear.app**	SaaS	88.5
5	**airwallex.com**	SaaS	88.1
6	**mintlify.com**	SaaS	87.2
7	**figma.com**	Utilities	84.6
8	**ramp.com**	Marketplace	83.3
9	**anthropic.com**	SaaS	82.8
10	**airbnb.com**	Travel	80.5

05

How this was measured

Protocol probes for every domain, plus live agent sessions for 10 of 10.

100%
with agent sessions

Each score blends deterministic protocol probes (robots.txt, sitemaps, llms.txt, JSON-LD, MCP and OAuth discovery, bot-challenge posture and per-provider reachability) with live agent sessions where they have run, graded against a rubric independent of the agent. 10 of the 10 domains here include agent sessions; the rest were scored on probes alone.

The snapshot records whether agent sessions ran for each domain, not which models they ran on. Each domain's live scorecard names the models behind its latest sessions.

The domains were last scored between Sep 28, 2026 (UTC) and Oct 6, 2026 (UTC), and the snapshot was taken Oct 8, 2026 (UTC). The numbers in this report are frozen at that point; the live scorecards keep moving.

The full method is at index.stuntdouble.io/methodology.
